

RICH AV DESIGN

Lead Installer

Job Description

The Lead Installer is the primary tech on a given job. You will work alongside other techs on the job and be the point person to interface with the customer, delegate tasks as required, and be responsible for completing the daily jobsite goals.

Job Description / Daily Tasks Include:

- Programming new and existing Savant and Lutron lighting and shading systems
- Setup new wired / wireless networks
- Install TVs, speakers, lighting control systems, motorized shades, and other audio /video related devices as required.
- Troubleshoot existing installations
- Provide technical support to both customers and other team members
- Fabricate AV racks in house, and onsite
- Run low voltage wiring in new and existing homes
- Help other team members as required

Job Requirements

- No less than 5 years' experience in A/V integration to include equipment rack fabrication, site preparation, termination and calibration of audio and video equipment, and implementation of control systems
- Proficient with networks, routers, firewalls, managed switches and WiFi access points
- Experience terminating Cat5/6, coaxial cable, and fiber with a variety of connectors, infrastructure cabling and termination skills
- Have the ability to quickly and logically troubleshoot and resolve technical issues.
- Have a clean driving record and a valid driver's license
- High school diploma or GED
